PROFILE

I'm a passionate web developer and data science enthusiast focused on building modern, user-friendly front-end and scalable full-stack apps. Experienced in React, JavaScript, Tailwind CSS, and backend tools. I love creating data-driven solutions, continuously learning, and collaborating to deliver clean, high-quality code and innovative products.

WORK EXPERIENCE

PRS MEMBER - CSI

Managed desk allotment, actively done C2C and coordinated participant engagement in the HackTheCosmos event as a proactive member of the Public Relations team

MEMBER IN DSBS STUDENT ASSOCIATION

- Organized two hands-on workshops focused on UAV image processing and drone management, leading planning and logistics for participants.
- Volunteered for "Data Conclave," supporting event execution.
- Supported the ICDSBS'25 international conference as a volunteer, assisting with event operations and attendee management.

PROJECTS

Campus management

Frontend web dashboard designed for universities and colleges, streamlining and digitizing academic administration for admins, faculty, and students.

Chat Application using socket.io

Developed a real-time chat application using socket.io, Node.js, React and Firebase

CERTIFICATIONS

- Certified in C & C++ from udemy
- Certified in Java & DBMS from NPTEL
- Participated in inter-college and intra-college Hackathons
